## DETAILED ACTION

### *Election/Restrictions*

- 1.1 Restriction is required under 35 U.S.C. 121 and 372.
- 1.2 This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
- 1.3 In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 69-88, 108-115 and 118-119, drawn to an optical controller with light sources, light detectors, and light reflectors.

Group II, claim(s) 89-107 and 116-117, drawn to encoding schemes.

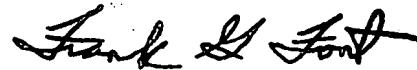

- 1.4 The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I claims 69-88, 108-115 and 118-119 are drawn to constructional details of an optical controller, whereas Group II claims 89-107 and 116-117 are drawn to improvements in code tracks and encoding schemes. There is no technical feature common to all of these claims.
- 1.5 Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
- 1.6 The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
- 1.7 Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
